

Dante Palmieri

(724) 420-1942 | business@dantepalmieri.com | dantepalmieri.com | LinkedIn

SUMMARY

Computer engineering graduate with hands-on experience across enterprise IT operations (NAU, PNC), embedded systems integration (Boeing capstone), and self-managed infrastructure (home-lab server). Comfortable moving between hardware, software, and operational support roles.

TECHNICAL SKILLS

Programming Languages: Python, C/C++, VHDL, Bash/Shell, MATLAB, JS

Tools: Git, Docker, Linux, Microcontrollers, KiCAD, Multisim

EXPERIENCE

Desktop Support Technician

NAU Information Technology Services

Aug 2024 – Present

Flagstaff, AZ

- Configured and deployed 10-20 faculty/staff computers weekly with NAU-standard Windows and MacOS images, supporting 250+ end users across nearly every campus department.
- Resolved up to 15 incident tickets weekly spanning printer, network, and phone issues, collaborating with full-time staff on complex troubleshooting.

Technology Intern, AI Transformations

PNC Bank

May 2025 – Aug 2025

Pittsburgh, PA

- Partnered with another intern to curate and input 500 knowledge base articles for an early-stage internal IT support chatbot, aimed at reducing employee time-to-resolution.
- Validated AI-driven financial covenant extraction models against source PDF documents, processing 1-2 documents weekly and contributing to measurable accuracy improvements (2-4%).
- Presented comprehensive project work to leadership and team members alongside fellow interns on the team.

PROJECTS

Boeing Autonomous Capstone Project

Electro-mechanical Lead

Aug 2025 – May 2026

Microcontrollers, C++, Wiring

- Contributed to the integration of 4 vehicle subsystems (steering, throttle, braking, sensors) across an 11-person team over a 7-month development cycle (Sept-April), successfully delivering 3 of 4 systems for Boeing's final review.
- Sourced and procured components for steering, throttle, and sensor subsystems, helping the team finish development approximately 42% under budget.
- Presented project at NAU Undergraduate Symposium, receiving top reviewer ratings (Strongly Agree) across abstract clarity, methodology, visual design, and audience engagement.

Home-Lab Server

Network & Platform

May 2024 – Present

Linux, Docker, WireGuard

- Deployed and maintain 13 containerized services on a self-hosted Ubuntu VPS managing 1.5TB of storage, with WireGuard VPN for secure remote access.

EDUCATION

Northern Arizona University

B.S. in Computer Engineering, GPA 3.12

Aug 2022 – May 2026

Flagstaff, AZ

Relevant Coursework: Artificial Intelligence, Operating Systems, Data Structures & Algorithms, Digital Signal Processing, Electric Drives
